We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car,

purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of “decision trees,” which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6)

factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement. These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate

and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator. Textbook for EMT training. The DVD walks students through the skills necessary to pass the EMT-Basic practical exam. J. David Bergeron Gloria Bizjak Keith Wesley ISBN: 0132833352 The first teaching manual ever for the "Wilderness First Responder" course, this title represents the cutting edge in medical training for wilderness rescue and self care. The schools affiliated with Tilton's program include the Wilderness Medicine Institute, a subsidiary of NOLS, and SOLO. One woman's incredible story of life on the front lines as an emergency medical worker in New York City. On the streets of New York City, EMTs and paramedics do more than respond to emergencies; they eat and drink together, look out for each other's safety, mercilessly make fun of one another, date one other, and, most crucially, share terrifying experiences and grave injustices suffered under the city's long-broken EMS system. Their loyalty to one another is fierce and absolute. As Jennifer Murphy shows in the gripping and moving *First Responder*, they are a family. A dysfunctional family, perhaps, but what family isn't? Many in the field of pre-hospital

emergency care have endured medical trauma and familial hardship themselves. Some are looking to give back. Some are desperate for family. Some were inspired by 9/11. Still others want to become doctors, nurses, firefighters, cops, and want to cut their teeth on the streets. As rescuers, they never want people to die or get hurt. But if they are going to die or get hurt, first responders want to be there. Despite the vital role they play New York City, EMTs are paid less than trash collectors, and far less than any other first responder makes, even though the burden of medical emergencies fall on the backs of EMTs and medics. Yet for Jennifer and her brothers and sisters, it's a calling more than a job. First responders are constantly exposed to infectious diseases, violence, and death. The coronavirus pandemic did not change that math; the public is just more aware of it. After 9/11, EMT training schools experienced a surge in applications from civilians wanting to become first responders, inspired by rescuers who responded to the terrorist attacks and rushed into the burning towers when everyone else ran out. The same will almost certainly be true post-coronavirus as people are moved by a desire to help in times of crisis in a more direct way. Funny and heartwarming, inspiring and poignant, *First Responder* follows Jennifer's journey to becoming an EMT and working during and beyond the Covid-19 pandemic. She will bring readers inside an intense world filled with crisis, rescue,

grief, uncertainty, and dark humor. First Responder will move readers to a greater understanding and appreciation of those fighting for them—wherever they live—in a world they hardly know or could imagine.
