Educating children and leading them towards the path of bilingualism is a valuable and challenging task for any educator. Effective language teaching can contribute to young learners' cognitive growth, develop their problem-solving skills, enhance their comprehension abilities, and provide children with the satisfaction of succeeding in the challenge

of learning a foreign language. All these issues must be taken under consideration when researching children and their teachers. The current literature indicates that further material is needed to provide professionals with different classroom situations and enhance the art of teaching children. Teaching Practices and Equitable Learning in Children's Language Education focuses on various perspectives of efficient practices, approaches, and ideas for professional development in the field of young language learners. The chapters in this book link the theoretical understanding and practical experience of teaching children languages by concentrating on teaching practices, material design, classroom management, reading, speaking, writing, and more. This book is designed for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the field of early language learning and applied linguistics at large. Fully revised and expanded for the first time in a decade, this is Guy Kawasaki's classic, bestselling guide to launching and making your new product, service, or idea a success. Whether you're an aspiring entrepreneur, small-business owner, intrapreneur, or not-for-profit leader, there's no shortage of advice on topics such as innovating, recruiting, fund raising, and branding. In fact, there are so many books, articles, websites, blogs, webinars, and conferences that many startups get paralyzed, or they focus on the wrong priorities and go broke before they succeed. The Art of the Start 2.0 solves that problem by distilling Guy Kawasaki's decades of experience as one of the most hardworking and irreverent strategists in the business world. Guy has totally overhauled this iconic, essential guide for anyone starting anything. It's 64 percent longer than version 1.0 and features his latest insights and practical advice about social media, crowdfunding, cloud computing, and many other topics. Guy understands the seismic changes in business over the last decade: Once-invulnerable market leaders are struggling. Many of the basics of getting established have become easier, cheaper, and

more democratic. Business plans are no longer necessary. Social media has replaced PR and advertising as the key method of promotion. Crowdfunding is now a viable alternative to investors. The cloud makes basic infrastructure affordable for almost any new venture. The Art of the Start 2.0 will show you how to effectively deploy all these new tools. And it will help you master the fundamental challenges that have not changed: building a strong team, creating an awesome product or service, and facing down your competition. As Guy likes to say, “Entrepreneur is a state of mind, not a job title.” His book will help you make your crazy ideas stick, through an adventure that's more art than science – the art of the start. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. “Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values.
