Rise & Shine — An Integrated Semester Course for Class 3 (Semester 2) Nov 25 2019 Rise and Shine - An Integrated Semester Course for Classes 1 to 5 has been designed and formulated in accordance with the guidelines of the latest National Curriculum Framework (NCF). It is a set of ten books, two for each class and one per semester. Each book includes subjects such as English, Mathematics, EVS/Science, Social Studies and General Knowledge. The key feature of the course is to make learning a joyful experience. Each book closely interweaves concepts to lay a strong foundation at the primary level. The course focuses on interactive approach to make the children active participants in the process of learning. Some of the key features of the series are :

- Based on the curriculum guidelines given by the latest National Curriculum Framework. □
- Graded and matched to the number of class hours planned by the schools. □
- Key concepts in each subject linked with interesting explanations; visual aids such as illustrations, photographs, diagrams, maps and tables; activities, games and real-life examples. □
- Carefully graded and comprehensive exercises for true evaluation. □
- Online support for © Animated lessons and interactive exercises for better understanding of the concepts learnt in the textbook. © Assignments and E-book (For Teacher's only) □
- Teachers Resource Book to facilitate teaching. Goyal Brothers Prakashan

Zoology for B.Sc. Students Semester III: NEP 2020 Uttar Pradesh (LPSPE) Mar 22 2022 This textbook has been designed to meet the needs of B.Sc. Third Semester students of Zoology as per Common Minimum Syllabus prescribed for all Uttar Pradesh State Universities and Colleges under the recommended National Education Policy 2020. It comprehensively covers two papers, namely, theory paper on Molecular Biology, Bioinstrumentation and Biotechniques and practical paper on Bioinstrumentation and Molecular Biology Lab. The Molecular Biology part of the book

emphasizes the fundamental features of various aspects of DNA, RNA, and protein structure, function, and expression. The regulation of Gene expression in Prokaryotes and Eukaryotes is presented in a very lucid and comprehensive way.

Botany for B.Sc. Students Semester III: NEP 2020 Uttar Pradesh

Jan 20 2022 This textbook has been designed to meet the needs of B.Sc. Second Semester students of Botany as per Common Minimum Syllabus prescribed for all Uttar Pradesh State Universities and Colleges under the recommended National Education Policy 2020. Maintaining the traditional approach to the subject, this textbook not only provides strong conceptual understanding, but also helps in developing scientific outlook of the student. It comprehensively covers two papers, namely, Archegoniates & Plant Architecture and Land Plants Architecture. While it aptly discusses morphology, anatomy & reproduction of bryophytes, pteridophytes and gymnosperms, it also covers palaeobotany and palynology in great detail. Practical part, covering Land Plants Architecture, has been presented systematically to help students learn experimental procedures swiftly.

Minority Student Retention Aug 15 2021 Student retention continues to be a vexing problem for all colleges and universities. In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals, and graduate, the figures have not improved over time. This is particularly true for minority students, who have a greater attrition rate than majority students. Demographic information shows that the minority population in the United States is growing at a faster rate than the majority. It is imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students. Retention rates should not differ appreciably among different racial/ethnic groups."The Journal of College Student Retention: Research, Theory and Practice" is the only scholarly, peer-reviewed journal devoted solely to college student retention. It has published many articles on minority student retention, and this topic continues to garner much attention. This book is a compilation of the very best of these articles, selected on the basis of reviews by a cadre of experts in the education field. The articles discuss African American, Latino/Latina, Asian and Asian Pacific, Native American, and biracial students, and institutional commitments to retaining a diverse student population. For those interested in this vital area, the collection will teach and inspire them to achieve greater heights and pay additional attention to retaining minority students in our colleges and universities.

Bayesian Psychometric Modeling Feb 06 2021 A Single Cohesive Framework of Tools and Procedures for Psychometrics and Assessment Bayesian Psychometric Modeling presents a unified Bayesian approach across traditionally separate families of psychometric models. It shows that Bayesian techniques, as alternatives to conventional approaches, offer distinct and profound advantages in achieving many goals of psychometrics. Adopting a Bayesian approach can aid in unifying seemingly disparate—and sometimes conflicting—ideas and activities in psychometrics. This book explains both how to perform psychometrics using Bayesian methods and why many of the activities in psychometrics align with Bayesian thinking. The first part of the book introduces foundational principles and statistical models, including conceptual issues, normal distribution models, Markov chain Monte Carlo estimation, and regression. Focusing more directly on psychometrics, the second part covers popular psychometric models, including classical test theory, factor analysis, item response theory, latent class analysis, and Bayesian networks. Throughout the book, procedures are illustrated using examples primarily from educational assessments. A supplementary website provides the datasets, WinBUGS code, R

code, and Netica files used in the examples.
