Susie Sakamoto, an Irishwoman in Japan, spends her days drinking heavily and cursing the home robot that takes care of all her domestic needs. She despises the thing her dead husband designed and is under the impression that it is about to do her harm. To escape the overwhelming grief of her missing family, she takes to the nighttime and the lawless section of the city, loitering in seedy bars with her wild, drug-fuelled, hypersexual friend, Mixxy. Are Susie's persecutions merely a result of her own paranoia? Can the parliament of owls gathering eerily in the trees outside be of any significance, any assistance? Or will

she have to search for the mythic Dark Manual, to find a way to finally switch off the homebot and end her litany of woes? ...it might already be too late...the machines are on the rise. Japan-based award-winning Irish writer Colin O'Sullivan couples his usual lyrical flourishes with tense and often terrifying noir-ish scenes, to present before us an unsettling vision of an anxious woman teetering in an anxious time. Fans of "Black Mirror," the dark humour of early Haruki Murakami, and even Asimov or Aldiss, will be keen to sample another frantic foray into a near and nervy future.

With more than 400 color illustrations and detailed discussion of more than 100 products, design concepts and works-in-progress, AppleDesign provides the most thorough examination of a corporate design group ever published. From the Macintosh to the PowerBook, the Newton MessagePad, the eMate and the just-released Twentieth Anniversary Macintosh, Apple's designers have given us some of the most compelling and enduring products of our time. He accessed computers and networks at the world's biggest companies -- and no matter how fast the authorities were, Mitnick was faster, sprinting through phone switches, computer systems, and cellular networks. As the FBI's net finally began to tighten, Mitnick went on the run, engaging in an increasingly sophisticated game of hide-and-seek that escalated through false identities, a host of cities, and plenty of close shaves, to an ultimate showdown with the Feds, who would stop at nothing to bring him down. *Ghost in the Wires* is a thrilling true story of intrigue, suspense, and unbelievable escapes -- and a portrait of a visionary who forced the authorities to rethink the way they pursued him, and forced

companies to rethink the way they protect their most sensitive information. "Mitnick manages to make breaking computer code sound as action-packed as robbing a bank." -- NPR Provides advice on how to evaluate the vulnerable points in a home, fortify the property discreetly, select security systems, choose weapons and use them under stress, and interact safely with aggressors. professional product designer. One of the most influential and innovative figures of the nineteenth century, his work, in different media ranging from textiles to ceramics to metalwork, still appears contemporary and is highly prized by collectors today. Dresser was also a pioneer in his vision of industry as a means to spread the tenets of good design. Working with over fifty manufacturers, he produced an astonishing range of reasonably priced, widely available consumer goods, while his belief in the supremacy of form over ornament resulted in designs that were truly radical in relation to contemporary Victorian taste. Seven leading specialists in the field explore the impact of Christopher Dresser's work in the context of that of his contemporaries such as Pugin, Owen Jones and Godwin. Over 300 illustrations illuminate the vast scope of his output, from Gothic-Revival cast iron to the experimental and highly innovative shapes and glazes of Linthorpe ceramics and his astonishingly modern metalwork. This groundbreaking book reassesses not only individual designs (many of them previously unattributed) but also his varied sources of inspiration, including the strong Japanese influence in his later work, and the profound impact his work has had on future generations. Draws on more than forty interviews with Steve Jobs, as well as interviews with family members, friends, competitors, and colleagues to offer a look at the co-founder and leading creative force behind the Apple computer company.
